RELOAD OF EMBASE

NOVEMBER 2007

New Fields:
RT= Record Type
UR Item URL; display only

Removed Fields:
CL= Conference Location; from File 73
CT= Conference Title; from File 73
DA= Conference Date; from File 73
DC= Descriptor Code
II= Publisher Item Identifier; removed as a searchable field but
   remains as a displayable field (II) and includes DOIs and PIIs
SH= EMCLASS Section Heading Codes

Notes:
1. As Descriptor Codes are no longer supplied by Elsevier, the
DC= index has been removed. All EXPLODEs should now be done on
terms, e.g., S FIBROSIS!
2. Section Heading Codes (SH=) are no longer supplied by Elsevier,
so SH= index has been removed.
3. All of the records in the file(s) have been re-indexed with the
2007 EMREE Thesaurus. Customers should check their SAVEd SEARCHes
and Alert profiles against the thesaurus for the most up to date
terms.

4. Customers who use data management tools may need to adjust
their templates.
